

WORLD HAPPENINGS BRIEFLY TOLD

The United States treasury intends to borrow \$2,000,000,000 during the last four months of this year.

Glasgow, Scotland, landed 10,000 tons of wheat from the United States in the last year, compared to 306 in the 12 months preceding the war.

Lord Woolton, British food minister, said the cost of distributing foodstuffs during 1943 was about \$1,000,000,000.

Three new rest camps are being built in Northern Rhodesia for African labour travelling from the "Cairo" by highway and its more will be started soon.

Dr. G. C. Hansen of Ottawa, chief of the Dominion geological surveys branch has predicted that Edmonton's population would swell to more than 200,000 in the next 25 years.

The world production of sugar in 1940 and 1941 was about 300,000,000 tons each year; 11,000,000 tons were made from sugar beets and 19,000,000 from sugar cane.

Nightlight overalls are planned by the British board of trade for the winter of 1944. They provide no utility except to be made from cloth having been awarded to Brit.

The United States army's Legion of Merit has been awarded to Brig. Donald Campbell of the British army for outstanding service in working with American officers on the supply problem for the United Nations.

A special depot has been set up in Geneva, Switzerland, to arrange distribution of Canadian Legion Educational Service Course, including books at the university level, to all British members of war in Germany.

Egg Production

All Eggs That Can Be Produced Will Be Needed

Egg production is a vital war effort, and all the eggs that can be produced will be required, not only for domestic use and for export to Great Britain.

In order to bring in increased egg production to meet the demand, the Dominion Department of Agriculture urges upon poultrymen the importance of maintaining suitable yearling hens.

The number of good pullets is not sufficient to fill the laying pens, production can be maintained by keeping over the best yearlings.

It is necessary that all laying houses should be fitted to capacity this year.

Pullets and yearlings should not be housed in the same pen, nor young pullets with older pullets. The older birds drive the younger ones away from the feed.

Yearlings that should be culled early are usually slow growers and poor producers, but active, alert yearlings with fresh, clean, bright, and soft feet and pliable, are generally the best layers.

Overcrowding at all periods in all places should be avoided, and plenty of feed and clean water provided.

Egg prices are close to the ceiling price now and will continue so until the spring. Be sure the egg prices are high to maintain and increase production.

OUR WAR PRODUCTIONS About 90 per cent. of all Canadian war production is delivered directly to the Canadian armed forces at home and abroad. The remainder goes to Britain, the United States, India, China, Russia, France, Australia, New Zealand and the South Pacific.

Wooden Wheels Save Rubber

It was the second month of the second year of their journeying, the twentieth of the twelfth. The cloud was taken up from over the horizon of the twelfth. The cloud was a symbol of God's presence, and the will of God. As to the nature of the cloud, who knew?

It was an undisciplined rabble that had left Egypt but now it had become a orderly host. Leave the wilderness "according to their journeying." The Lord said to Moses, "I will give it to you."

The cloud above the wilderness was a symbol of God's presence, and the will of God. As to the nature of the cloud, who knew?

It was a undisciplined rabble that had left Egypt but now it had become a orderly host. Leave the wilderness "according to their journeying." The Lord said to Moses, "I will give it to you."

Combing Wool Tresses

Combing is not a ritual reserved for blue-blonde show girls or for some young thing's tresses. It is one of the processes by which the finest cotton bales are prepared for use.

In the picture above, a woman worker is making certain that her combing machine removes all impurities from the cotton rolling off the fuzzy bales.

Cotton is lighting in this way, because being used for uniform fabrics, it is made into soft and smooth goods, such as flannel, and so on.

Health LEAGUE presents **TOPICS OF VITAL INTEREST**

IMMUNIZATION WEEK

National Immunization Week, during which Canadian parents will be urged to avail themselves of the immunization services of the health authorities.

Attention will be directed especially to the importance of immunizing children for diphtheria, measles and whooping cough, which continue to take a heavy toll of the province's youth.

Attention will be directed especially to the importance of immunizing children for diphtheria, measles and whooping cough, which continue to take a heavy toll of the province's youth.

Shortage Of Wool

People In Netherlands Have To Do Without Heavy Socks

An indication of the great scarcity of wool in the Netherlands is given by an advertisement recently appearing in a Dutch paper, offering "socks made of white linen and cotton."

There are many who said that they were not wearing socks for some time, and that they were not wearing socks for some time, and that they were not wearing socks for some time.

There are many who said that they were not wearing socks for some time, and that they were not wearing socks for some time, and that they were not wearing socks for some time.

There are many who said that they were not wearing socks for some time, and that they were not wearing socks for some time, and that they were not wearing socks for some time.
